

I do not want people calling me all hours of the day soliciting for his/her company. It violates my privacy and my rights as a citizen. The current DO NOT CALL LIST for New Jersey is just what we have been asking for. I can finally eat a meal in peace with my family without someone on the other end of the line butchering my name. No one has any right calling me at home except friends and relatives. If I'm intersted in a product or service, I'll contact the company myself. What the solicitors are actually doing is turning me off to their company. I will not patronize any business that calls its customers at home. If the FCC plans on overturning the current DO NOT CALL LIST, it will be detrimental to every citizen who holds their privacy sacred.
